

The Swedish Security & Defence Industry has the pleasure of inviting you to visit our stand (No D201) at Eurosatory 2010 and meet some of our member companies:

Carmenta is the leading supplier of Geographic Information Systems (GIS) and associated professional services for geospatial applications such as mission critical systems to handle digital maps and real-time position data. The flexible and capable GIS development tools significantly reduce our customer's lead-time to market. www.carmenta.se

Comex Electronics manufacture eavesdropping protected computer systems, access control systems using a CCEAL4+ certified smartcard and biometric reader, and BeThere®, a unique product that combines physical and logical access control. www.comex.se

CybAero develops, manufactures and markets Unmanned Aerial Vehicles (UAV). We operate in the autonomous helicopters segment and our objective is to minimize human risks in hazardous environments. www.cybaero.se

Habia Cable specialises in the design and manufacture of custom design cables and cable harness assembly systems where the requirements are for high performance cables. We provide conductor, screen, insulation and sheathing materials and designs to your specific cable requirements, including halogen free and safety cables, industrial cables, multicore and special coaxial cables and sensor cables. www.habia.com

Imint is an innovation's firm, specialized in real time video enhancement and exploitation software targeting primarily aerial video intelligence, www.imint.aero

Sepson is one of the leading manufacturers of hydraulic vehicle-mounted winches in Europe. They make standard winches as well as customer specified modifications and are also able to include all additional winch equipment – everything between PTO and rope end. www.sepson.se

Sjöland & Thyselius is experts on advanced technology and provide companies and government agencies with systems and services tailored to suit their needs and is also the largest commercial centre of excellence in aerodynamics in Scandinavia and has a close cooperation in research and development with industry, universities and governmental institutions, nationally as well as internationally. www.st.se

Teleanalys is a Swedish small, highly efficient and competent company specializing in developing, designing, delivering and installing communication products and systems, primarily for use in tough environments. www.teleanalys.se

ÅAC Microtec develops, manufactures and markets miniaturized and robust multifunctional electronics systems. By combining the best suitable packaging techniques ÅAC offer solutions based on state-of-the art microelectronics and MEMS technology, and services for optimal life cycle performance. www.aacmicrotec.com

ÅF group is a leader in technical consulting, with expertise founded on more than a century of experience. They offer highly qualified services and solutions for industrial processes, infrastructure projects and the development of products and IT systems and one of the leading names in certified third-party testing and inspection work. www.af.se

Åkers Krutbruk Protection are a part of the IBD-group and a world leader in protection solutions e.g. mine protection, ballistic protection and spall liner system. Our tailor made concepts - designed for land, air and naval platforms - are used all over the world, safeguarding personnel on humanitarian, observation and peacekeeping missions. www.akerskrutbruk.se

Swedish Security & Defence Industry Association is the largest organisation for companies within security and defence in Sweden. Our mission is to inform government, customers and other target groups of the importance of our industry and enhance our companies' conditions on the domestic, EU and global market. www.soff.se
